

About Hive Systems

Accelerate your Cybersecurity

What is Hive Systems?

**Hive Systems provides
smarter cybersecurity
solutions with our
trusted experts.**

**We help keep your
information secure
anywhere – so you can
reduce risk everywhere.**

About Us

Hive Systems **promotes a true partnership with you and your team** by first understanding what makes your organization unique. That lets us get to work understanding how your business processes are supported by IT. So whether you're creating the latest web app, handling the finances of your clients, or providing lifesaving treatment at a healthcare facility - **your processes and information can remain secure.**

Cybersecurity that's approachable.

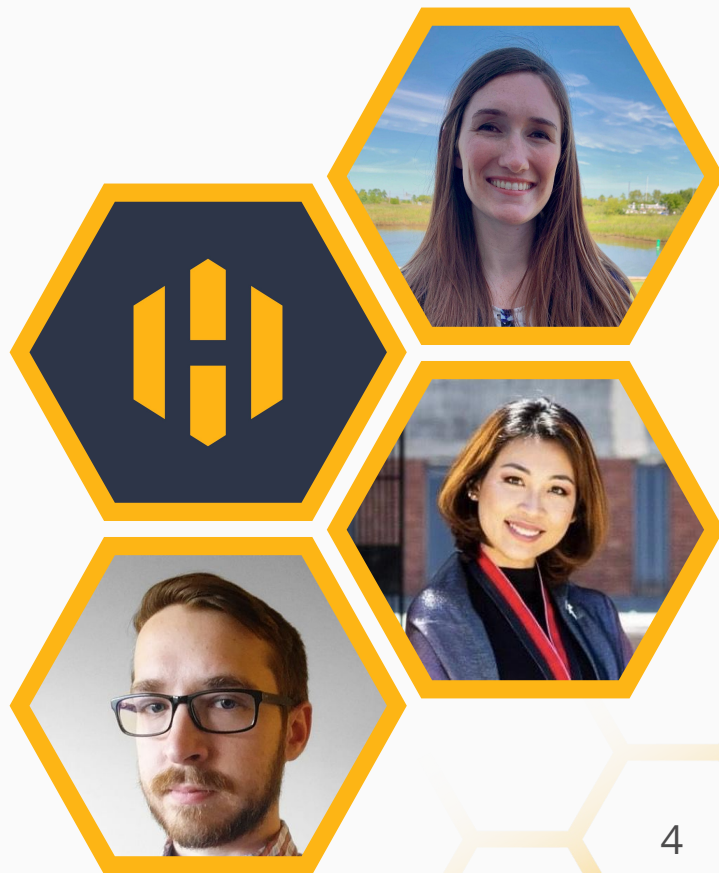

Our team of experts **leverages our collective experience** to help evaluate your cybersecurity strengths and identify opportunities. Together, we'll develop a risk reduction **strategy that best utilizes your existing investments**, including both technology and people, to help you **move towards a secure future** in a way that aligns with your goals and business operations.

Meet Our Team

The Hive Systems team is composed of **expert cybersecurity professionals** with decades of direct cybersecurity experience at organizations of all sizes and in all industries. Team members are only leveraged as their expertise is needed to deliver on our services, allowing us to **bring the most value** to **you and your team**.

Our team members hold numerous industry certifications, including but not limited to:

- › ISC² Certified Information Systems Security Professional (CISSP)
- › Amazon Web Services Certified Solutions Architect
- › ISACA Certified Information Systems Auditor (CISA)
- › EC-Council Certified Ethical Hacker (CEH)
- › ISC² Systems Security Certified Practitioner (SSCP)
- › CompTIA Security+
- › Lean Six Sigma
- › Red Hat Certified System Administrator
- › VMware Certified Professional
- › And more.

What Brings Us Together Guides Us Forward

PASSION

for what we do

We love cybersecurity and it impacts everyone. We speak about it in an approachable way that's tailored to whoever we're talking to at that moment. Our team delivers new and innovative ways to reduce risk in pursuit of cybersecurity excellence. In a dramatically shifting landscape, we are constantly engaged with the latest news, emerging technologies, and pursuit of continuous education.

We are consistent in delivering the best value to our clients and customers. Our work reflects a shared understanding of the problem and we are perspicacious in applying it to our work. Everything we do, from draft documents to final deliverables reflects our commitment to high quality.

Precision

in our work

EQUITY

for everyone

We believe everyone should be seen, heard, valued, and empowered to succeed. Being open to diverse perspectives fuels innovation, deepens connections between people, and makes us a better company.

Our success and our reputation are driven by our ability to deliver on our promises without compromising what we stand for. We continuously improve by blaming problems, and not people, because people are the backbone of any business – including ours. We are honest and transparent with our clients, our customers, and our team members so that no matter what challenges we face we do so openly, honestly, and together.

TRUST

in who we are

What We Stand For

We believe that cybersecurity should be approachable for anyone – because it impacts everyone.

From our founding in 2018, we believed that only helping those who sought help wasn't good enough. That's why we've committed our time, effort, and knowledge to improving cybersecurity awareness, education, and improvements for everyone with our pro bono outreach initiative: **Hive Helps**.

To date, nearly a dozen nonprofits and community organizations, along with countless members of our hometown have learned from us on how to continue their important missions and stay safe online.
